

First Look **Photo**

Visual Brand Guide

Colors, typography, spacing, imagery and UI style — for the Host Playbook, future ebooks and social content. Visual reference only; not a content or messaging guide.

first-look-photo.vercel.app

Color palette

Coral is the one accent — used sparingly for CTAs, links and small highlights. The base stays neutral (white / off-white / charcoal) so the accent stands out. Don't introduce new brand colors.

 Accent #FF5A5F CTAs, links, icon mark, highlights	 Accent — dark #E00007 Hover / pressed states	 Accent — light #FFE7E4 Soft tinted callout backgrounds	 Text — primary #222222 Headings, body copy
 Text — secondary #6A6A6A Supporting copy, captions	 Background #FFFFFF Page background	 Background — alt #F7F7F7 Cards, secondary sections	 Border #EBEBEB Hairlines, dividers

Typography

Poppins throughout (fallback: Inter, Nunito Sans or Circular — never serif, script or condensed).

H1 • Bold 700

Help your short-term rental win the first look.

H2 • Bold 700

What's included, packages and pricing

Lead • Medium 500

Professional short-term rental photography and listing guidance.

Body • Regular 400

Guests make fast decisions. Your photos need to stop the scroll and explain the stay.

● Logo & icon mark

Two concentric circles, coral stroke — pairs with the "First Look **Photo**" wordmark (charcoal + coral, Bold). Keep clear space around the icon roughly equal to its own radius. Never recolor, outline or add shadows to it.

● Buttons & UI accents

- **Buttons** are always fully pill-shaped (999px radius), bold label text.
- **Numbered badges** (e.g. step 1, 2, 3): solid coral circle, ~32px, white bold number.
- **List markers:** coral checkmark (✓) for benefits/checklists, coral em-dash (—) for credentials.

● Spacing, shape & elevation

Corner radius

Elevation

Low-opacity only — no hard drop shadows, no skeuomorphism.

● Photography & imagery style

Every photo in the Playbook or social content should match this look — the site's own portfolio is the best reference.

- **Light:** bright, naturally lit, true-to-life color — never HDR or over-saturated.
- **Palette in-photo:** whites, warm wood, soft grey/beige, one natural accent.
- **Framing:** wide but realistic, level horizons, no fisheye, tidy staging.
- **Subjects:** interiors, exteriors, decks — often with a view.
- **Aspect ratios:** 4:3 for grids/tiles, ~2:1 wide for hero banners.
- **Editing:** natural correction only — AI-assisted enhancement should stay photo-realistic.

● Aesthetic, in one line

Clean, warm, uncluttered, editorial-but-approachable — Airbnb-inspired in structure without copying Airbnb's branding — mobile-first, generous

whitespace, one accent color used sparingly, calm and trustworthy rather than loud.

 Quick do / don't

Do	Don't
Use coral only as an accent, never a background wash	Introduce new brand colors beyond the palette
Keep typography to Poppins (or the documented fallback)	Use serif, script or condensed/techy fonts
Keep corners rounded — pill buttons, soft card radii	Add heavy drop shadows or skeuomorphic effects
Use real, bright, naturally-lit property photography	Use over-saturated, HDR or heavily filtered photos
Leave generous whitespace between elements	Crowd a layout — keep one clear focal point per page
